DETAILED ACTION

1. This application after a decision by the Board of Patent Appeals and Interferences has been reopened.

Claim Rejections - 35 USC § 112

2. Claims 25 - 29 recites the limitation "computer program product" in the preamble of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 12 – 29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 12 – 18 represent an abstract idea or software per se not tangibly embodied nor in executable form.

Claims 19 - 21 Are software per se. The claims appear to be a software system not tangibly embodied without any means requiring hardware.

Claims 25 – 29 product is undefined with the closest media which is not limited to a tangible embodiment. The closest definition in the Specification describes a medium but also includes a "transmission-type media" including "communication links".

Corrective action is required.
